Respected technological leader skilled in guiding cross-disciplinary teams and building cultures to create better software. Lifelong mentor and teacher committed to raising others up holistically. Thoroughly invested in a continuous learning mindset focusing on business and technology, breadth and depth. Current professional interests are Team of Teams agility, Lean Portfolio Management, and Agile at Scale operations.

Effective communicator and project manager experienced in change management and workforce planning who is able to influence, promote, and implement transformative technologies and processes. Agile evangelist incorporating the best of Scrum, Kanban, Lean, SAFe, Six Sigma, and other frameworks to meet deliverables despite dependencies and roadblocks. Doggedly focused on outcomes rather than outputs in order to deliver iterative, future-proof solutions which satisfy stakeholders across the organization.

SOLID, DRY solutions architect and software engineer with a wide range of experience building bespoke websites, RESTful APIs, cross-platform mobile apps, and cloud DevOps solutions. Advocate for test-driven development (TDD) and accustomed to context switching between a variety of projects and languages.

Employment

2020–Present | **Technical Solutions Delivery Manager**. American Family Ins., Madison, USA
Managed multi-discipline, virtual team of technical professionals to deliver a greenfield P&C insurance white-labeled servicing platform which was the first of its kind to use Enterprise APIs and have a shared product vision across operating companies.

Key Achievements
—Enterprise 2022 Digital Ambassador: Bridged different levels of the organisation as a representative of the ongoing enterprise digital transformation. Shared feedback on new technologies as well as the barriers that affect individual and team productivity
—Enterprise 2021 Venture Fellow: Educated in InsurTech and venture capital initiates
—Enterprise 2020 Digital Builder: Utilised cloud computing, data science, and programming to address problems at multiple levels of the enterprise

2019–2020 | **Senior Software Developer**. Blain Supply, Inc., Janesville, USA
—Architected next generation of retail mobile apps used in stores, warehouses, and DCs
—Introduced Agile workflows and automated testing & build systems
—Led development on new UI codebase and mentored junior developers

2018-2019 | **Senior Front-end Web Developer**. Propeller Health, Madison, USA
—Oversaw several user interfaces within the larger HealthTech product portfolio
—Championed and implemented legacy codebase rebuilds and mentored junior developers

2017–2018 | **Senior Web Developer**. RecommenderX, Dublin, Ireland
—Responsible for UI architecture of a FinTech big data analytics and visualisation platform
—Led user interface team and mentored junior developers

2013–2017 | **Lead Web Developer**. Ellefson Technology, Toronto, Canada
—Project leader in charge of coordinating developers and designers. Managed client relations
—Architected and implemented projects ranging from one-page websites using content management systems (CMS) to Software as a Service (SaaS) products to high-traffic, luxury e-commerce sites. Mentored junior developers
