- Adept at bridging gaps and navigating business, technology, and humanities concerns

Experience (Selected)

2023–Present

Senior Manager, Software Engineering *Capital One. McLean, VA*

Manager of managers leading 4 hybrid tech teams across Mobile, Web, and Backend and focused on developing industry-leading open banking solutions as well as more broadly enhancing Capital One's customer engagement with Retail Bank products.

Key Achievements

—Led my teams to win the premier Enterprise award by driving innovation and impact across Tech at Capital One (TechX) out of 2,500+ eligible teams

—Guided team innovation that produced 5 patent applications for open banking solutions

—Received highest Bank LOB award for cross-disciplinary leadership excellence and innovation

—Formally acknowledged for my role training and certifying technical interviewers and for personally conducting 100+ interviews

—Achieved a sustained improvement of ∼8% SLA remediation of code, infrastructure, and cyber security vulnerabilities across the division through standardized documentation and processes

—Designed and delivered training programs for 30+ managers across the Enterprise on associate development plans, actionable feedback, and performance management

—Championed a direct liaison channel between executive leadership and 2,000+ associates as a founding member of the Divisional Engagement Council and drove cultural initiatives that enhanced employee sentiment and operational cohesion

Technologies: Android, Angular, Apache Airflow & Kafka, AWS, BMAD, Claude, Databricks, Docker, ECS, iOS, Gemini, Java, Jenkins, Kafka, Kotlin, Lambda, New Relic, Python, Snowflake, SNS, Splunk, Spring Boot, SQS, Swift, Terraform, Windsurf

2020–2023

Technology Solution Delivery Manager *American Family Ins. Madison, WI*

Led a multidisciplinary hybrid team of 20 to deliver the first Enterprise P&C insurance white-labeled consumer servicing platform spanning operating companies thereby enabling the decommissioning of legacy platforms and streamlining of operations by $5M per year.

Key Achievements

—Engineered a comprehensive KPI framework to benchmark performance across the Agile Release Train and reduced sprint delivery variability by ∼20% as well as increased transparency for stakeholders during a major digital transformation

—Spearheaded a divisional Tech cross-training and up-skilling initiative that enhanced team flexibility and supported engineers through the transition off of legacy platforms

—Facilitated development of a comprehensive design system in Figma which established a single source of truth that reduced frontend development cycles by 50% and ensured consistent UX across the multi-brand platform

Technologies: AWS, Datadog, Google Cloud Platform (GCP), Guidewire (PolicyCenter), Material-UI (MUI), Nest.JS, Node.js, Nx, React, Python, Sitecore, Snyk, SonarQube, TypeScript
