- Strategic technology leader with over 14 years of experience driving digital transformation and high-impact software delivery across a wide range of industries
- Track record of delivering business value at every stage of implementation and in fostering innovative and high-performing engineering cultures with a continuous growth mindset
- Adept at bridging gaps and navigating business, technology, and humanities concerns

Experience (Selected)

2023–Present

Senior Manager, Software Engineering

Capital One. McLean, VA

Manager of managers leading 4 hybrid tech teams across Mobile, Web, and Backend stacks and focused on open banking solutions as well as more broadly enhancing Capital One's customer engagement with Retail Bank products.

Key Achievements

- Transformed engineering culture culminating in the Enterprise TechX award which is the singular recognition program for teams making an impact across Tech at Capital One
- Fostered innovation that produced five patent applications for pioneering open banking solutions
- Awarded the President of Banking and Premium Products's TEAM award for cross-disciplinary leadership excellence and innovation
- Recognized as a Tech Selection Champion representing 1% of the total Tech interviewer population and embodying the highest ideals and values due to my role as an interview mentor as well as conducting 100s of interviews
- Achieved a sustained improvement of ~8% SLA remediation of code, infrastructure, and cyber security vulnerabilities across the division through standardized documentation and processes
- Designed and delivered training programs for 30 managers across the Enterprise on associate development plans, actionable feedback, and performance management
- Championed a direct liaison channel between executive leadership and 2,000+ associates as a founding member of the Divisional Engagement Council and drove cultural initiatives that enhanced employee sentiment and operational cohesion

Technologies: Android, Angular, Apache Airflow & Kafka, AWS, BMAD, Claude, Databricks, Docker, ECS, iOS, Gemini, Java, Jenkins, Kafka, Kotlin, Lambda, New Relic, Python, Snowflake, SNS, Splunk, Spring Boot, SQS, Swift, Terraform, Windsurf

2020–2023

Technology Solution Delivery Manager

American Family Ins. Madison, WI

Led a multidisciplinary hybrid team of 20 to deliver the first Enterprise P&C insurance white-labeled consumer servicing platform spanning operating companies thereby enabling the decommissioning of legacy platforms and streamlining of operations.

Key Achievements

- Engineered a comprehensive KPI framework to benchmark performance across the Agile Release Train and increase delivery predictability and transparency for stakeholders during a major digital transformation
- Spearheaded a divisional Tech cross-training and up-skilling initiative that enhanced team flexibility and supported engineers through the transition off of legacy platforms
- Facilitated development of a comprehensive design system in Figma which established a single source of truth that reduced frontend development cycles and ensured consistent UX across the multi-brand platform

Technologies: AWS, Datadog, Google Cloud Platform (GCP), Guidewire (PolicyCenter), Material-UI (MUI), Nest.js, Node.js, Nx, React, Python, Sitecore, Snyk, SonarQube, TypeScript
